Selling my Civic Type S as I have just bought a Type R. I have owned the car for two years and spared no expense in maintenance during my ownership. You will be able to see from the receipts and history that I got with the car that it has always been well looked after in terms of maintenance prior to my ownership. It has recently had all new tyres, front discs and brake pads during a full service at a Honda dealership. The engine runs superbly well. You will be able to see from the photos that the exterior has quite a few marks, mainly on the plastic trim and bumpers. There are also a number of small chips on the bonnet and one on the windscreen. The interior is in great condition with usual wear on the steering wheel for a car this age. I have priced the car according to the condition of the exterior. I have fitted an aftermarket stereo with bluetooth audio, USB etc but still have the original unit if desired. MOT to April
