

Introduce baby to a place full of exciting sights and sounds and lots of safe jumping fun with the Fisher-Price Rainforest Jumperoo. Designed for use by a child who is able to hold his or her head up unassisted and who is not yet able to climb out or walk, this baby jumper delights baby with interactive play options and stimulating movement to help encourage healthy development. Promotes comfort and security The Rainforest Jumperoo is a safe and comfortable place for baby to sit and play, whether they stay for just a moment or for several minutes. Two soft leaves extend from the frame to create an overhead canopy with soft toys that dangle down for fun bat-at play. It also features a rotating seat with soft spring covers that keep little fingers safe from pinching and three-position height adjustment for a custom fit. Stimulating interactive play Everything your baby needs at playtime can be found in the Rainforest Jumperoo. Its frame allows you to open it up from the top and lets the seat rotate 360 degrees so your baby can play and interact from any side. A fun seat and toys at five locations on the platform engage baby all the way around and an electronic toy at the front has motion, music and lights that can be activated by baby spinning a drum. Parents can also activate an option for four minutes of continuous play. Little explorers will also enjoy playing with the Jumperoo's many animals and toys, including a bobbling elephant, a monkey swinging from a vine, a parrot hanging from a bead bar, a clear spinning bead ball, a tiger that plays hide and seek, a spinning lizard that makes rattling sounds, a tethered chew toy and a stack of chips with eye-catching graphics for baby to explore. Encourages healthy development The Rainforest Jumperoo is designed to help encourage healthy development. Moving, spinning and jumping in a baby jumper enhances large motor skills. Secondly, the variety of textures integrated into the rainforest toys provide tactile stimulation, while the bright colours and fun music engage your child's visual and auditory

senses. This educational system also enhances learning through discovery: the baby's actions make things happen, helping them to understand cause and effect. Simply reaching and grasping onto the hanging colorful toys makes their eye coordinate better. Easy to use, foldable and store, it will appeal to the mom who loves the portability of her Rainforest Jumperoo. The frame presses in a nested position, it can be folded away when not in use, and it easily folds in a bag to carry it anywhere. Also room doorway is required to use this toy, making it a breeze to set up anywhere. The Rainforest Jumperoo includes motion sensor that encourages kids by rewarding them with light and sounds when they jump. It has a weight capacity of 25 pounds and requires three AA batteries (not included). It measures 32 x 40 x 37.
