Here we have an HP Pavilion Entertainment Laptop fully working with an AMD dual core processor, 2 gigabytes of system memory, & a 160 gigabyte Hard Drive. It has windows 7 ultimate edition installed, firefox & chrome browsers. It also has an HDMI port, & a built in subwoofer. The only slight problems with it, are a thin green line down the left side of the screen, & the "C" key on the keyboard does not work. Apart from this it is working.
