

NAD C 372 Stereo Integrated Amplifier (200 GBP)

Location

West Midlands, Worcestershire

At 150-watts per-channel, the C 372 is capable of powering many of today's demanding low-impedance, audiophile-grade speakers with the power and finesse of a traditional separates component system. The massive internal amplifier features a Holmgren™ toroidal transformer and NAD's proprietary PowerDrive™ technology and can be bridged into a mono configuration to deliver an incredible 400-watts (8-ohms). The preamp section of the C 372 is impressive on its own, boasting 7 line inputs, main-amp inputs and 2 preamp outputs. While there are direct access controls on the front panel, the SR-5 remote provides the convenient control of features and general use.
