Memory Upgrades on all systems and brands (new or old)

Blue screen of death issue

Motherboard replacement

Internet connection repairs

No screen, flickering screen or dim screen repairs

Data recovery, damaged or lost files. Hard drives & flash drives

My computer does absolutely nothing when I switch the power on. Sounds like your power supply has failed. We provide only top quality replacement power supplies for all makes of computer systems.

Beware of cheap power supply units. When they fail they can take your whole machine with it. We only supply power supplies with active protection circuitry which protects the components inside your

computer in the event of a power supply failure. My computer is running really slow what's going on?

There are many reasons that a computer will run slow. It could be a virus infection, spyware infection or even a hard disk problem. You might have completely up to date anti-virus software and still be infected.

We've seen it many many times. Drop your machine in for an inspection and we'll let you know what's wrong. We have a team of experienced technicians who can help you with all your computer repair needs.

Our prices are very competitive and we offer a no obligation service. When your computer comes in, we'll diagnose the problem and give you a quote for the repair. We'll also check your machine for any other issues, inside and out.

Most of those issues are just things that can be fixed away from your machine. Once it's fixed, it'll be cool and quiet. ;
