Location

London, London

<https://www.freeadsz.co.uk/x-440732-z>

I am an undergraduate student, currently taking BSc in Economics at the London School of Economics (LSE).

I come from Singapore and I have graduated from College with A in my GCSE A levels for Physics, Chemistry, Mathematics and Economics. (A is the highest possible grade for Singapore's A levels, instead of A\*). English is my first language and I am fluent in both English and Chinese.

I have two years of teaching experience and I have taught more than 30 students, some in a one to one format and some in classes. Most of my students have managed to improve by one to three grades after two months of lessons.

I am able to give one to one tuition lessons for chemistry, physics, economics and mathematics for students from year 7 to year 13.

I am willing to travel to the student's location (preferably near central or southeast London).

Please text me at 07460741006 074607410... (click to reveal full phone number) if interested to discuss the price and timing of the.
