Freeze Life Pictures Presents: YOUR SPECIAL DAY! Your special day will come and go but your photos will last a life time. As one of the few things remaining from your special day it's an honour to provide your precious memories for you. I take care to ensure that what you want from your photos is reflected in the photos you get. With my friendly and relaxed approach to taking your photos you will find that not only can we capture those formal photos of your friends and family but I will dive in to the day capturing those moments, looks, glances and smiles that make up your precious memories of your day. My Style In addition to capturing those formal shots, I love to capture all the different candid moments that make up your big day. I also like to get to angles and places that not all photographers do to get interesting, varied or dramatic photos. When it comes to photo selection I remove any duplicates and test shots. You then receive the full array of photos that were taken on your wedding day. I do not edit my photos very much. I am a big fan of capturing the natural beauty of people and their surroundings. I sparingly use artistic flairs like black and white photos to give your photo collation a gentle style and variety. Why Choose Me? A fun, friendly and professional service.No hidden extras.Full quality photos for you to print or use how you choose.Fully insured and electrically tested.
