The Nikon D810 SLR camera blends great versatility, freedom and high-technology to yield quality and high-resolution still images and videos uncommon in most DX-format cameras. It boasts a 36.3 MP CCD sensor which is paired with Nikon's innovative EXPEED 4 image processing for flawless detail retention and an extremely wide dynamic range. This sleek camera takes production to the next levels with videos that match the image quality at a 1080p resolution. These are either uncompressed to an external device,

compressed to an internal CF/SD card, or both simultaneously. The ISO Auto Adjust lets you transition between dark and light scenes without any iris or frame-rate adjustments. Exposure Smoothing lets you create smooth and even time-lapse sequences, while the Highlight-weighted Metering lets you preserve details in both the shadowy and bright areas of stage performances and other spot-lit.
