Just passed an Mot. Due to current high levels of stock, this vehicle which has been taken in part exchange is being sold at a lower price than its normal recommended retail price, this is to try and generate a quick sale without having to prepare the vehicles bodywork to our usual high standards, therefore any marks, scuffs, scratches and chips will not be rectified at the point of sale at the current price. Having stated this please keep in mind that there is no major damage on the vehicle and it is hpi clear, it just age related cosmetic damage that is to be expected on a car of this age and mileage before being fully prepared for a retail sale. Mechanically it drives well.
