thanks Outstanding features of this motorhome include:

Bedroom: Luxurious fixed rear bed - ready to roll into at the end of the day without the hassle of having to put it together. It's got a quality sprung mattress too so absolutely no "roughing it" involved! The bed lifts up to provide useful additional storage and there is a lockable safe for your valuables. There is adequate space around the bed for either partner to get up without having to disturb the other and an all important bedside shelf either side so you can have all your nighttime essentials such as phone, drink, book etc close to hand. So absolutely no excuse for your partner not to get up in the morning and make you a cup of tea! There are wardrobes either side of the bed and an useful dressing table area with mirror and storage below to keep you looking beautiful. Privacy screen can be drawn across bedroom area. Sockets and designated TV space also provided, so you can watch the telly in the morning whilst waiting for your breakfast to be cooked.

Toilet/Shower Room: Thetford toilet with electric flush for all the convenience of home plus a separate shower in cubicle with sliding curved door. Piping hot water and great water pressure means you can stay fresh and fragrant even if you are in the middle of a field.

Kitchen: Full sized oven and four burner hob with one electric plate and overhead extractor fan. We have cooked fantastic steaks, roast dinners and even a birthday cake while away and somehow food always tastes better than it does at home. There's a microwave too and plenty of sockets for toaster, kettle and so on. Loads of kitchen cupboards as to be expected in a van of this quality and a good sized

sink for your hardworking partner to wash up while you relax in the comfortable lounge area with a glass of wine. Large size fridge, small freezer compartment for your self catering requirements. The motorhome incorporates two inward facing fully padded travel seats as well as two outward facing seats. Two tables which will slot together to make an additional table. A comfortable chair is also in the lounge area. There is a spacious and entertaining TV area. Overhead storage locker for coats, shoes and a bracket.

Cab: There is a spacious double bed in the overhead cab area accessed by a step ladder. Children love this "den" which has its own windows and light. Draw the curtains and they are in their own little world. Alternatively if you manage to escape without the kids, this makes a great additional storage area. The driver's seat and passenger seats both swivel to give extra seating in the lounge should it be needed and there are blinds all around the cab area for nighttime privacy.

The Camper is equipped with warm blown air heating and hot water facility which means you can enjoy

going away even in the winter and still be warm and toasty. Heating/Hot water can run off gas cylinders or mains electric hook up. Lights can run off the 12v battery or electric hook up. There are lockers outside the vehicle at the rear for storing larger items such as outdoor table and chairs, bbq and so on. There is an external gas plug in point for cooking on gas outdoors. Large wind out awning to keep the sun off if you're lucky!

Techy Bits

The van carries a twin bottle Gas-Flo system which is a breeze. You just fill it up at a garage and it seems to last forever. No carrying heavy bottles to and fro.

Original Blaupunkt Sat Nav Reversing Camera. Sat Nav might need to be updated.

The twin axle design means that you carry as much weight as you need effortlessly.

The van has a 3 litre 160 hp turbo diesel engine with around 25,000 miles showing on the clock. Plenty of power on tap if and when you need.
