Webcam Description... Ready to go! An exceptional machine, just been upgraded to full Corsiar XMS and Windows 7 64Bit and in full working order just been rebooted to factory settings. Great Entry Gaming PC. Works without fault. 2 of the 4 front USBs don't work as not connected (can be reconnected but didn't need them) plenty more on the back alongside all the usual connections. A real bargain and has been a good friend to me but just upgraded to a faster CPU for specialised simulators. This was designed to run FSX so exceptionally efficient. PickUp only or I can deliver between Portsmouth and Slough for a small fee. Grab a real.
