Got a black xbox 360 for sale. Works okay but the disc drive is a bit dodgy. It does play almost all games but doesn't like a few which is why there's a spare disc drive with it too which you can fit. It doesn't play the zoo tycoon games atm but it might do when the disc drives replaced as there's 2 of the games in the case, one of them should work. Comes with all the games seen and the skylanders bundle. The eject button is missing but you can eject the disc on the home screen so isn't a problem. Has all leads, chat pad for the controller, charging unit, charging cable, spare disc drive, headset and all games have been checked and has all the games in it. Has 120 GB storage and on the storage also has minecraft, fable 3, a world of keflings and many more that i cant remember. Looking for £70 for.
