A very good quality, almost new Casio CTK-3000 Electronic Keyboard with Touch Response. It feels like a piano, and sounds like a piano, unless you choose otherwise, in which case you can make it sound like just about any instrument you like! I bought it as a Christmas present for my daughter during her short-lived musical phase. It was well researched at the time, and was the best product available in the price bracket +/- £120. Here's the link to the Casio site for more details.

Comes with a wire music stand included (as you can see in the picture) and power adaptor, which is another £10.
