

MIG Welder (150 GBP)

Location

South East, West Sussex

<https://www.freeadsz.co.uk/x-457051-z>

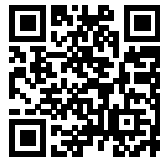

Telwin Master MIG 120 Welder - A professional standard Mig Welding machine with adjustable power outputs for either 0.6 or 0.8mm wire. Kept in a dry clean garage and well looked after. The machine has not had a great deal of regular use but when used it has been with both 0.60mm and 0.80mm thickness wires welding various steel thicknesses from 22swg (car repairs) to making fillet welds on 3/8" thick steel, my garage roof sections. It has been very reliable occasionally used continuously daily for several weeks. It is the ideal size for a small workshop with 13amp sockets and a 240volt AC single phase domestic supply. The welder uses standard 5kg coils of wire and will be supplied with the part used coil of 0.6mm wire already loaded plus a spare nozzle, wire guides for the torch, a used welders visor and the original instruction manual. The machine is not a cheaply made DIY machine it is a heavy duty machine for professional use and accordingly it is quite heavy, possibly in the region of 80kgs without a cylinder - we are unable to weigh it - . The gas cylinder photographed, is a BOC Argoshield rental cylinder which is not included in the auction. Trading Terms:- Sold as viewed by buyer.

This is a collection only item - no delivery is offered.

Payment is by cash on collection.

This is a used item there is no guarantee or warranty, promised or inferred.

Returns policy: - There is a non returnable policy for this.
