Black, The motorcycle that changed how sports motorcycles were built. The Honda CBR900RR Fireblade wiped the floor with its competitor motorcycles not by being more powerful but by being lighter. Rivals were all well over 200kg, the first Honda CBR900RR Fireblade was just 185kg which made it perform superbly. It's still a wild ride and a surprisingly practical motorcycle too. Proven technology made lightweight very much the Honda CBR900RR Fireblade's philosophy. It worked extremely well. The in-line four, 16 valve, liquid cooled engine grew from 893cc to 918cc by 1998 but it always set the motorcycle alight with plenty of power at any revs and a dab of character too. Despite making a motorcycle with revolutionary light weight, Honda didn't cut corners in terms of quality. Honda CBR900RR Fireblades can easily run to 100,000 miles with routine maintenance. The bike will be serviced and come with 12 month's MOT. This bike has been imported from the Continent and will be UK registered on an age related number plate upon sale. The registration transfer paperwork can take 2 - 3 weeks depending on timescales from DVLA. The North West's finest family run motorcycle dealership, £3,495 no
