Triumph's profile of this bike In the Daytona 675, we've made exceptional the new standard. This is a true track day tool, focused & committed. Taking our experience gained on track and road with the outgoing bike and combining the latest developments in engineering technology and thinking, we're giving you an even faster, better handling, easier riding bike. In most 600cc classes and most races there is a Triumph 675 on the podium, it's not witchcraft, it isn't voodoo it is the simple fact that the engineering and design that has gone into this iconic sports bike truly works, and works extremely well! The Triumph is a bike of smaller stature so it isn't really suited to taller people, which in fairness is probably the Triumph's only downfall, if you can consider weight saving, an aerodynamic frame and design a downfall? The bike is finished in Triumph red and almost has the look of a Ducati from certain angles. This is an excellent example of a fantastic road / track bike and if you have never considered one, please visit the shop and have a go as you won't be disappointed. The bike may be of smaller stature but packs a very mighty punch, and at only £6995 she is priced to sell! REF
