Silver, 1 owner, This is a seriously good bike at a seriously great price. We already knew the MT-09 platform had shades of greatness. With that stonking triple's fuelling ironed out it's status is confirmed: it's both immensely versatile and thrillingly invigorating. The chassis, now the fork settings have been tweaked, is without criticism. The Tracer now adds to that with decent range and comfort, excellent all-round ability and impressive spec and sheen without hurting that value at all. It's great fun, characterful, useful and a bike for all reasons. It's also, already, a leading contender for 2015 Bike of the Year, Plus 60 pounds documentation fee, Bill Smith Motors Celebrating over 50 years in Business! £7,295 p/x
