

Broken Aiwa LCX-257 Micro Compact System Hi Fi (speakers and tape deck working)

Location **North, Cheshire**
<https://www.freeadsz.co.uk/x-465129-z>

Small Aiwa Hi-fi bought around the turn of the century, speakers/cassette tape deck/clock/headphone output working fine, CD player and radio not working. Has an aux output which I think still works. Speaker wires are attached so I'm guessing you need some electronic skills to separate them. Comes with some cool tapes of live Chili Peppers show and radio documentary/live Placebo and James Brown/random shit off the radio.
