MacBook White -pristine condition running
10.7 but can be upgraded to El Capitan. £200

Or would exchange for

Samsung Galaxy Tab 10" Review /MacBook

Thanks to its stellar industrial design, superior ergonomics, and above-average performance and battery life, the 13-inch MacBook)

is a compelling buy. Both price- and performance-wise, this notebook falls between Windows-based competitors like the ASUS U30Jc and Lenovo IdeaPad Y460 , but beats both in terms of endurance. The main question is whether you'll want to spend extra on the 13-inch MacBook Pro, which has an SD Card slot, backlit

keyboard, more RAM, and a sleeker aluminum chassis. If you can live without these amenities, the MacBook is a very good value. ;
