

Bronze Cutless Bearing Housing for 25mm diam Bearing amp Shaft (65 GBP)

Location

South East, West Sussex

<https://www.freeadsz.co.uk/x-471064-z>

This is a used cutless bearing housing to take a 25mm diameter bearing and propellor-shaft. It is made of cast bronze, and takes a 50mm long bearing, which was rather short for our 1 metre long prop shaft, so we have changed to a 100mm long housing and bearing. It is still in excellent condition and will be fine for a short prop shaft, or a situation where there is not enough room for a longer bearing housing such as inside a rudder aperture on a long-keeler.

The inboard end of the casting is threaded for attaching to the stern tube, and the threads are 16 TPinch, or 6TPcm, and 1.475inch internal thread diameter on a 1.5 inch diameter tube. The two anti-twist bolt holes are at 4.3 inch, 110mm, centres.

A suitable new section of bearing is available at no extra charge.

Asking £65 ono

Buyer collects or I could post it at.
