

# Cosmetic Crowns

Location

**West Midlands, Worcestershire**

<https://www.freeadsz.co.uk/x-471299-z>

The E-Max and Zirconia crowns are a ceramic crown which is of long lasting aesthetic quality. They are preferred due to their highly attractive appearance which ensures that they complement the rest of your teeth. These types of crowns give an appealing translucent colour which is combined with extra strength and durability. The crowns are made from a single block of lithium disilicate ceramic this is a high grade material which has been harvested for its toughness, durability and opaque qualities which makes it a highly recognised crown. These crowns will give you the best match in colour and shape with your own natural teeth. They are strong long lasting and are unlikely to crack or fracture as can happen with many other types of cosmetic crowns, veneers and bridges. <http://eliasmilecentre.co/>
