Here I am selling my Sony Blu Ray player complete with 850w 5.1 surround sound system complete with remote control and all required cables. The reason for selling is I am about to upgrade to 4K. The player also supports Full HD 3D Blu Rays, upscales normal DVDs. The player has HDMI sockets and also supports ARC which means it can sync with your Sony TV if you have one of those. Great way to improve your sound especially on these new slim TVs which look great but have terrible sound. There's a little sign of usage but overall the system and speakers are in decent condition and all work perfectly and also a little dent on the blu ray player itself but very minor. Sensible offers are considered. Collection would be preferred, however i can deliver locally as.
