With the 2016 holiday season just around the corner, it is time to prepare your ecommerce for the extra business. Not only will you get extra traffic and need your servers to handle it but also know how much inventory you have. Your website will need to load fast and look festive to keep customers happy. If these sound like good tips, make sure you find out what else you need to do by researching and preparing on time. We have researched and compiled a list of tips that cover everything from inventory to your website, personalized offers and shipping.
