

I am looking for four ladies to join my team! If you are passionate about health and beauty and have an outgoing nature then you could be the perfect Act-Labs Ambassador. This is an opportunity to run your own business on either a part or full time basis from home which is ideal if you have young children or are looking for an additional income. One of the things that I love about working for Acti-Labs is that there is scope for individuals to turn their own business into one that suits their own talents, interests and style. Some Act-Ambassadors focus heavily on one area such as the make-up or nutritional side and others go for the lot! I think the most important thing is that you enjoy what you do and have a genuine interest as this is what really generates success. The products are not only affordable but they are premium quality with results that speak for themselves. When I became involved with Acti-Labs, my main priority was to work with products that I believe in and am proud to recommend. As a beauty therapist I have seen a lot of products over the years and I am fussy!! However I have been continually impressed with Acti-Labs and use them in my treatment room and for myself. As an ambassador your job is to recommend the products in a way that you enjoy. This could be through social media or parties or both. Benefits:

- Commission starting at 20% paid weekly on all sales
- Progressive rewards
- Additional Acticash - rewards for meeting certain sales which means points for gaining products in addition to your commission.

On going training in the form of excellent video tutorials as well as support and help from me as your upline.

A chance to build your own team and the opportunity to earn more. Low risk - you can start for £20 for the

purchase of your online kit, this gives you your own personal act website to promote. You are then able to purchase products from your own act website for your ambassador you want to promote. Alternatively, you can use kits from vendors, amounting to the product as well as your personal website. This is a very cost-effective way of getting quite a number of products at a much lower price than the ones you are going to use. You must also take some time to give the kits the value of 50% of their value at the time of enrollment on the basis that the new ambassador commits to making sales to match the value of the remaining 50% - this is quite easy. But if you decide not to do this you simply pay the remaining cost of the kit. After the cost of the starter kits there are no further obligations or targets - you can then continue at your pace. However, we would love to hear from motivated and determined ladies who intend to succeed and make themselves some money! If you are interested then please feel welcome to phone me in the first place so that I can explain how things work and answer your questions. <http://act-lab.com/me/caroline>
