Drives ok and starts first time, but engine light on and can't afford to get it looked at so spares or repair. Lots of receipts (cambelt/ new brake discs/pads/ all new tyres), some service history, all old MOT certs. CD/radio works fine, 2 keys, remote central locking, clean interior, four decent tyres, 16" factory-fitted alloy wheels, spare in boot. Aircon not working, electrics all functional. Paintwork tatty in places and some parking scratches/dents (see photos), driver's side wing mirror loose. Very reliable car until recently when became sluggish at low revs and engine light on, don't know what the fault is. Any more questions please.
