

The tank of the high quality Wesen Inox Flat electric water heater holds 50 litres and is built with the latest technology. It is reliable, durable, energy-efficient and low maintenance. The high quality and competitively priced the Wesen Inox water heater is the flattest model on the market. With its rectangular shape and depth of a mere 10.3" (26,2 cm) it will fit into most kitchen cabinets. Another big advantage of the Wesen Inox Flat is that it can easily be installed either vertically or horizontally. And with the included mounting bracket, power cord (supplied unassembled), an 8 bar safety relief valve, screws and plugs it comes as a complete set. Its digital display makes operating very easy and the power button (that no other competitive brands have) makes it even more unique and versatile to use. Switch the 'Power Button' on and all heating elements will operate simultaneously reducing the heating time significantly. The two tanks are made of Inox (stainless steel) which makes it corrosion free and low maintenance (replacing the anodes is no longer necessary). Whereas the two separate cylindrical tanks reduce the heating time, the PUR foam insulation and the ingenious controller makes this water heater to be very energy-efficient. Specifications: Water Heater Wesen Inox Flat 50 litre; Suitable for: shower for 2-3 people, shower and washbasin 2 people; Direct heated; Dimensions (HxWxD): 75 cm (29.52 inches) x 49,8 cm (19.60 inches) x 26,2 cm (10.31 inches); Nett weight 14,7 kgs (32.41 lbs); Free of charge safety relief valve. Use this valve to retain your guarantee; Suitable for both horizontal and vertical installation; Digital display; user-friendly and allows you to accurately read the temperature. Increments of 5 degrees 220/230 volt; Power button to speed up heating time by running all 3 heating elements simultaneously. Unique feature in the industry!; Two lightweight stainless steel (Inox) tanks making it corrosion free. Unique feature in the industry!; Two smaller tanks accelerate heating time and solve pressure-related

issues having to withstand less pressure per square centimeter; Magnesium anode
for protection; Light weight, so easy to transport and install; On a wall; Heating elements:
infrastructure x 700 Watt each; Angle in second tank: 700 Watt; Heating time to 45 degrees in minutes;
power: 1624, power on for 1-5; Maximum inlet working pressure 8 bar / 0.8 MPa; Fresh water pressure
for no steam insured; Hot water connection; Anti-freeze; Water proof IP 24; Eco friendly;
year anti-corrosion guarantee on the tanks; 2 year guarantee on all other components; Fast delivery: 2 to
