Veneers are a wafer thin ceramic shell that is placed over the surface of the tooth and bonded to achieve a smooth unnoticeable finish. Veneers are very popular with patients that wish to improve the overall aesthetics of their smile, as veneers will provide your teeth with a look you have always dreamed of. Veneers can combat a number of problems; They can help with the reduction of any gaps and spaces between the teeth. They can help improve an uneven smile They can hide any damaged teeth or teeth they are cracked or chipped They can hide any discoloration of the teeth They can help with any crooked teeth (although alternative treatment may be discussed) <http://eliasmilecentre.co.uk/> ;
