

Toylander Series 1 Land Rover electric car (2,500 GBP)

Location **South East, East Sussex**
<https://www.freeadsz.co.uk/x-474881-z>

Constructed by myself (a retired car builder/restorer) to a very high standard using only new materials and components. It has forward & reverse, brakes, lights, horn, speed control & parking brake. The windscreen & tailgate fold down as does the seat back allowing an adult to drive. It is driven by twin motors to the rear wheels with 2 12volt batteries supplying the power. It has sufficient power to carry up to 1 adult & 3 children and will run between 4 to 7 hours on a single charge (depending on terrain.) It comes with a new 12/24volt charger, bonnet lock & motor isolator switch. It's finished in Land Rover Bronze Green cellulose and is completely silent in use (apart from the squeals of delight). With care and a little maintenance will give some lucky children years of.
