Luxury interior design Interior Design - is a complex task, which includes a number of additional steps, such as the concept of lighting solutions, the choice of furniture, textiles, etc... The modern market offers a variety of interior and new electronic technologies for the management of your home, decorative items, all kinds of materials, heat sensors, motion sensors, touch or sound lighting and much more. Sometimes on such a variety of head is spinning. Successful design is not limited to any color scheme you pick what floor covering, or pick up some accessories.

Of course, all this is important, but no material or expensive furniture is not practical to make your home life, unless its design is to trust a specialist. Advantages of working with us is that everything we design in 3D image -. Furniture, carpets, textiles and other decorative items, all that is possible to find in our markets. Everything you see on the 3D image will correspond to the finished result. The design project includes:

- Design concept
- Lighting Design
- 3D visualization (with an overview of each room and move and view every detail)
- Technical drawings
- Selection of furniture and equipment
- Author's supervision
- Technical Supervision Due to individual approach you will get an elite interior, which is not just nice to look at, but also in which to live comfortably with the whole.
