Bought new in November 2006 as a spare for my son and the contents have only been out of it twice - once in 2006 to check everything was there and once recently to take these photos. Never used, not even plugged in. Comes complete with controller with 3m cable, standard AV cable + scart adapter, power cable and instruction manual plus other literature that came with it (including the receipt from Argos). Box still excellent Cash on collection.
