

Kitchen water heater 5 litre Lemet Greenline (101 GBP)

Location

Yorkshire and the Humber, West Yorkshire

<https://www.freeadsz.co.uk/x-478109-z>

The tank of the high quality Lemet Greenline electric water heater holds 5 litres and is built with the latest technology. Lemet offers great value for money. Lemet water heaters are durable, low in maintenance, reliable and energy-efficient. The smaller Lemet units are perfect as a kitchen boiler: the 5 litre model being small enough to be installed under the sink. The tank is made of enamelled steel and thick PUR foam insulation keeps the water warm for longer. The 1500 watt heating element will heat up the water quicker than the average competitive models making the Lemet water heater much more energy efficient and reducing energy consumption significantly: WARM WATER ON DEMAND. And with the included mounting bracket, power cord (supplied unassembled), a 6 bar safety relief valve it comes as a complete set. Produced in the EU, Lemet water heaters are CE marked, compliant with UK building regulations as well as ErP compliant. Lemet comes with a 2 year guarantee. IMPORTANT: This valve needs to be installed with the water heater for the water heater to function properly. If you do not use this pressure safety valve or a kiwa certified 6 bar safety valve the guarantee will be void. Specifications: Water heater Lemet Greenline 5 litre Close In; Approximate capacity with normal use: washbasin for 1 person, click for calculator; Suitable for: washbasins in houses, recreational buildings, boats, caravans and rv's.
