

X large upcycled industrial stainless steel plant tubs planter trough pot holder drum (

Location **South East, East Sussex**
<https://www.freeadsz.co.uk/x-481616-z>

These started off life as drums in commercial tumble dryers but have been removed and upcycled to be used as extra large garden pots. This one is plain around the sides with riveted seams and has a central mesh for drainage at the base. Being stainless steel they will keep their good looks for a long time and will add a wonderful industrial edge to a modern garden scheme. They can be planted up with multiple seasonal plants for a blaze of colour or with just one specimen plant such as a palm, cordyline or phormium. It measures approx 45 cms high and 59cms.
