At iCare we design and provide individual care solutions to ensure the highest level of care, security, and well-being of our customers. iCare will design and install a secure alarm and monitoring system into every client home. It monitors your home and those inside 365 days, 24 hours a day x 7 days a week. The system is designed specifically in accordance with your home and your personal lifestyle preferences. We set the monitoring rules in accordance with your lifestyle and personal needs preferences. The system is remotely monitored by a leading Alarm Receiving Centre. The moment something untoward happens, the system will notify those in your home and your nominated carers and family members. Your carers can remotely monitor your activity. A panic facility allows you call for help at any time. The system also acts as a fully functioning burglar alarm system with remote monitoring. The system meets all current security
