

Burton Moto Snowboard Boots, UK 9 EUR 43 (69.99 GBP)

Location **Scotland, Nairnshire**
<https://www.freeadsz.co.uk/x-483850-z>

As the best-selling snowboard boot of all time, the Burton Moto can be seen on the feet of more riders than any other boot. Offering plush comfort and relaxed response, at a price that's hard to beat, the Moto offers mid-flex performance that suits riders who want a boot that can go-anywhere-do-anything. The Burton exclusive Speed Zone quick lacing system features two pull cords which control the tightness of the upper and lower sections of the boot. This allows you to fine tune the fit of your boots effortlessly without having to completely unlace your boots and start from scratch, meaning you no longer have to keep your friends waiting at the start of every run. The laces are constructed using New England Rope, known for its high durability and longevity in extreme conditions, so you can be sure they won't fail you when you're in back of beyond with a long hike out. Featuring a heat mouldable Imprint 1 Liner with integrated lacing for a secure and snug fit. Power Panels on the liner help to transfer energy to the medial and lateral sides of the boot, while the Level 1 moulded EVA footbed provides lightweight and long-lasting shock absorption. The liner also features Burton's Sleeping Bag reflective foil, a low-profile underfoot technology which reflects heat back to the feet, improving both warmth and comfort when faced with cold conditions. The DynoLITE Outsole offers superior cushioning, improved board feel and solid support in a 20% lighter weight construction than boots using a traditional outsole. Made entirely from a cushioning compound which is specially formulated to withstand repeated impacts and freezing temperatures for long lasting shock absorption. Shrinkage Footprint Reduction Technology reduces the boot's overall footprint one full size, meaning your boot fits true to size but has the footprint of a boot one size smaller. This keeps the boot shorter, lighter and more streamlined which all helps to reduce the instances of dreaded toe or heel drag. Burton's Total Comfort construction gives the boots an instantly broken-in feel right out
