

# Angelcare Movement amp Sound Baby Monitor (AC401) (45 GBP)

Location **London, London**  
<https://www.freeadsz.co.uk/x-484714-z>

2-in-1 Movement & Sound baby monitor, which detects even the most subtle sounds and movements from your child with the SensorPad. The Angelcare Movement & Sound Monitor uses 8 channels and 2 frequencies to ensure the crystal clear transmission, as well as both volume control and vibration alert to ensure you can adjust the sound levels to suit both you and your baby, ensuring you can monitor them with the sound off. There is also the added reassuring audio 'tic' function to let you know that your monitor is still looking after your baby even when they're sleeping silently.

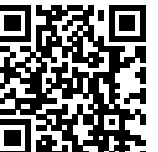

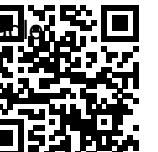

The Movement and Sound Monitor also shows the temperature on the full colour display, which also shows a number of other monitoring features so you'll always know what is happening if the sound is off. The monitor has a range of 250 metres with an alarm that sounds if you lose connection, which gives you confidence that no matter where you are, your baby is safe. The SensorPad is designed to pick up even the slightest of movements, even if the baby has wriggled off of the pad. If it cannot detect anything for 20 seconds an alarm will sound.

With added features such as the nursery unit also working as a nightlight, a temporary hold and mute for when you need to change or hold your baby for a short while, and the units being both mains or battery operated in case of power failures, the Angelcare Movement and Sound Monitor has you and your baby covered.

Included:

- 1 x Parent Unit
- 1 x SensorPad
- 1 x Nursery Unit
- 1 x SensorPad
- 1 x Adapter
- 1 x Instruction Manual

Can be used as audio monitor without the sensor pad. Suitable from birth.
