Entrance Piers / Gate Pillars / Gate Piers

We Design, Manufacture & Install Cast Sandstone Entrance Piers or Gate Pillars to enhance Historic or Period Style houses.

We can replicate any architectural element or detail taken from your Period House and reproduce them into our fine cast stone Entrance Piers.

Whether your property style is Elizabethan, Georgian neo-classical, Victorian Gothic, Art nouveau, Art Deco, Contemporary or Modernist, our bespoke Entrance Piers will harmonize perfectly with your period house design. As period and listed building restorers, we have provided our professional services and sound advice, since 1978.

Our stone Entrance Piers are completely individual and unique. As period brickwork specialists, we can also incorporate period brickwork into the pillar design, eg stone plinth supporting a brickwork shaft, topped with a stone cornice & cap. You will not find our Entrance Piers in any builders merchants or garden centre !

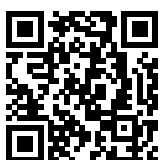

We design the piers, manufacture the moulds to make them, cast the finished article and install them.

We do not know of any other company that offer this personal, in-house and in-depth service. Prices start from just £2,650 for a pair of Lion Piers supplied and fitted in the Chester area. Approx average Pier size: 1600mm high x 450mm wide x 450mm wide

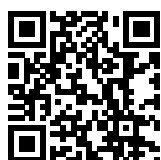

We are based in Chester, but will provide an UK wide service, if required. We offer a Free local site survey.

But if you live outside the Chester area, we could still appraise for Free, but initially, via the internet.

To do this, you would need to send pictures of your property and existing site entrance along with your technical details. (The pillar design sizes available at all periods!) For more details please call on: 07840 934m 368 (07840 934m 368) or click on the link below. This service is provided by: (Builder (Building) of Chester, Cheshire. Period & Listed Building Conservation & Restoration Specialist. ;
