This is a really lovely Smiths electric clock mounted in a walnut type cabinet.

I bought this over 25 years ago in Fairfield Antiques market, but since moving several years ago have not had anywhere to put it so have decided to sell.

As you will see from the inside the clock, it was made in the original Smiths Cricklewood factory. I was told it could be a lot earlier than the 50's but am just assuming its around that era, though you may be able to find out from the numbers!

Collection only please and I am in the Shirley part of
