I have the above for sale. Great laptop with a large beautiful 17" screen. This laptop has 3GB Ram, and a 230GB hard drive.

Dual core 2Ghz processor. It has Windows 7 Ultimate installed, but I don't have a product key.

It still works totally fine, but just pops up every now and again saying that Windows is not genuine. I have made a DVD of the Windows 7 Ultimate system. (The product key is on the underside of the laptop is for Vista that it originally came with). Works really fast and efficient, however the battery is not great as is a problem with older laptops...so best used when always plugged in...unless you buy another battery. The outer top casing has some scratches on it, but the inner casing, screen and keyboard are very clean. One main point is that the CD drive makes a weird buzzing noise for about 30 seconds or so when you close it. After that, it stops. It's a little temperamental in that sometimes it does not recognise a disc...but after a few tries, it's fine :)

Also, the plastic front cover for the CD drive is missing, so you have to push the small button on the side with your finger.

Apart from that, a really great laptop for the family home with a nice big screen. Has 3 USB ports, an SD card slot, Ethernet, phone line, HDMI, and VGA out.

Comes with charger. £80 I live on Coombe Road in Brighton.

I can deliver for free within
