SnoozeShade Original brand new in packet, RRP £19.99. Selling as it is a duplicate we received as a gift! We use our other one all the time! Designed to fit on all strollers etc. We have used it both as protection against the sun and as a sleep aid, and it works brilliantly for both. What I love the most is that you can leave the zip open a little way, allowing you to maintain visual contact with your baby whilst still maintaining sun protection and allowing for very little difference in change of light if they are sleeping. It folds up in its own little sack so that it takes up only a really small space in your baby changing bag, meaning that it's easy to carry everywhere you go - perfect for the ever changing British weather as well as for packing to take on holiday. I really wish this product had existed when I had my first child as it is so much easier and more efficient than parasols and other sun shades I used with her. I would highly recommend this product, it is one of the best baby products we.
