

VW T5 6 seat Camper Van, Long Warranty, Brand New build (26,250 GBP)

Location **Wales, Carmarthenshire**
<https://www.freeadsz.co.uk/x-491292-z>

Van cost (used) plus conversion cost (new) £32,768 (with receipts to prove) Current Value: £29,500+ (this value is based on a used but as new conversion. Mine however, is brand new unused) Want only £26,250 (saving over £6,000 on actual cost!) As long as £20,000 is paid I'd consider anything else to make the rest up even in small bits like TVs, motorbikes, kayaks, etc. Etc. Etc. Location: South Wales 62 plate VW T5 6 seat one of a kind style of camper for sale (not your usual rock n roll bed but something very special and more than meets the eye)

Just completed conversion, done maybe 300 miles since. **Conversion is covered by warranty until December 2017** Built by a company with a very good reputation and a waiting list up to 3 months as can be seen when compared to many others built by cheaper companies. Also has had cam belt and water pump changed as part of service which was done roughly 900 miles or so ago. Done ahead of schedule for peace of mind. Fantastic engine and gearbox Full width bed so unlike 3/4 rock n roll which most are, this can sleep two adults and two children. More if you add a tent ;) Unlike standard rock n roll ones, this has views all round for those inside making for a more spacious feel This one of a kind modular design means you can remove parts of the rear to increase load space. Full service history along with pictures prior to conversion to prove it had an easy life. Registered as camper with DVLA Details below of just some of what's been done but this does not list everything as sooooo much to this one. Being sold for over £3,000 less than actual value at just £26,250 due to time of year. (Current valuation is £29,500) but as long as the majority is in cash, I'd consider taking other goods in part exchange. (Bike, motorbike, car, tv etc.) Insulation and Carpet:

• Fully Insulated Using Airtec double insulation and high temperature spray adhesive

• Ply Boarded – 6mm thickness

• Anthracite interior, standard 12v high temperature spray adhesive and 12v power windows

• 12v 100ah AGM battery, 40v hood

• 100ah 60v rechargeable battery, 60amp battery cable and 60amp fuse

• 12v 100ah AGM battery, 40v hood

• 12v system for LED lighting and power supply to 12v sockets using .75 2 core flat cable

• 582 strip LED lighting with waterproof protection

• 240V Socket, Light switch, cigarette lighters All CBE products

• Dump x2 for tap and shower at rear Windows

• Fixed passenger middle window

• Slide opening on doors middle

• Rear 1/4 windows fixed and tinted

Lots more, all brand new! Pictures prior to conversion to prove its had an easy life & during to show quality of work Pictures showing as conversion progressed so you can see things such as how clean the cuts, gaps between outer and inner skins after cut properly sealed etc. There is so much more to this than on here so feel free to either message me through here or call me. Would part ex on a BMW 640D Why am I selling?

When I asked the company to start work on this I was fit and healthy and wanted this with the intention of driving around Europe, particularly the Alps. But my health has taken a turn for the worse and so far the hospital has not diagnosed my issue which as a result means I am now suffering from sleep deprivation and as such driving on the wrong side of the road, especially through the Alps, would be a very silly idea. Hence the reason for sale without even using it
