Very good condition, well looked after and very reliable. Selling due to just got car licence. It's had the clutch totally replaced brand new. Had brand new back box and side boxes fitted. One scratch on the tank but almost all the fairings and the handguards have been replaced new. Can provide receipts for all the work done on it, including servicing. It would make a great bike for someone who has just passed the bike test as it is smooth around town and then when you open it up on motorways, dual carriageways it takes.
