Fujitsu AH530 15.6" Lifebook

Upgraded to 8Gb RAM & 500Gb HDD from new - has just been upgraded to Windows 10 Pro

This laptop has been cleaned and maintained regularly and is in very good condition generally. It is only being sold because I've been treated to a new ultrabook. The left mouse button is a little loose compared with the right button which isn't unusual but works okay and there is a small nick on the spacebar. There will be the odd superficial mark around the case because it's been used. The laptop has always lived in an office environment whilst plugged in to it's mains charger, so the battery appears to still be in a reasonable condition and holds charge. That said, the laptop's display is HD, bright and glossy so even a brand new battery's life will be somewhat limited. The OEM mains charger is included.

If you have any further questions please feel free to send a message.

The item is available for cash on collection from the Cranbrook (TN17).
