According to EPCH in times when almost all gifts spells out the 21st century lifestyle, a handicraft gift is a time tablet that takes us to a different point in time. Handicraft gifts are quite popular as both personal gifts and traditional ceremonial gifts. With a history of traditions that are as diverse as our culture, there is not a single traditional ceremony that passes by without a handicraft presence. From weddings to honoring and mementos, handicrafts enjoy the spotlight as gifts.
