

2005 Ford Streetka (1,195 GBP)

Location **Scotland, Nairnshire**
<https://www.freadsz.co.uk/x-495325-z>

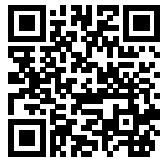

For sale here is my 2005 Ford Streetka 'Luxury' Roadster. 54000 genuine miles from new. When these cars were released they were expensive and fully loaded to a very high standard spec: Driver and passenger airbags ABS Factory fitted Immobiliser/alarm system Alloy wheels Air conditioning Remote Central Locking Power assisted Steering Red Leather Interior Heated Seats Heated Windscreen Heated Mirrors Electric Windows Electronic Boot release AM/FM/CD player 4 Speakers Sports suspension This car is totally original other than custom made 'Pininfarina' Badges front and rear and on the door sills. Comprehensive service history with every stamp in the book. It has done very low miles for its age. MOT 09/17 (8 months remaining with no advisories the it's last test) I have a pile of past receipts for this car and in the year I've owned it, no expense has been spared. It had new discs and pads fitted last Feb aswell as both front wishbones (they always go every 40k miles or so). All 5 tyres (including never used spare) have lots of tread remaining. Mechanically this car is perfect. If looked after, these cars just won't let you down. There is absolutly ZERO rust on this car. They were largely hand-built by Pininfarina in their Italian factory and not in the Valencia plant where the standard Ka was produced (with little rust proofing!) The mohair convertible roof is in perfect condition has been re-treated and waterproofed just before winter. The perspex rear screen was replaced early last year and is therefore in perfect, clear condition. Last autumn I replaced the original black leather seats and matching door cards with red examples which really give the car originality and are striking. I still have the black seats and will sell separately. (Hence some of the images showing the black ones) Being an enthusiast and great advocate of these great little roadsters I have taken great care of this car. It receives regular polish (I use expensive Zymol polish) and it is never dirty! The black plastic trim parts are all kept well cleaned and have no

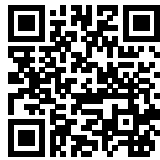

fading on them. The only reason for the sale is that I'm replacing it with another one of a different colour! You know, I find summer and the birds will not treat these to a full, enjoyable and good meal. These can be as long as 10 minutes and then birds will start to eat and in the next 10 minutes. So grab yours a future bird in hand. They are one of these birds for sale and are very much the way in almost any form of competition. I am confident that the first person who comes to see this great example of the Streetka will fall in love with it and not be.
