

FAWN COLOUR. one of the healthiest colour. 3 left from litter of 6 The girl is red coloured 1500 ono
VERY playful. Just sweet baby We also have two boys
They are like a boys...so crazy :) 1300. solid body, strong bones.
All of the pups are micro chipped, are fully vaccinated and have their first and second jabs for rabies, also
have had professional treatment against fleas and worms. They can go out.
Each one of the puppies have a passport, so they can travel no problem. These gorgeous French
Bulldogs are taught how to use a Puppy Pad and can spend time in a cage, of course with water and a
toy.
They love to play in my garden. They can also travel in the car without being sick and remain calm. They
eat dry food that has been soaked in water (so it is soft and easy to eat), 3 to 4 times a day - very small
portions. These puppies don't like extreme temperatures, they are not pups who can be left outside in
cold or hot weather. They are amazing company, they have very big ears, short legs and chunky bodies.
We would prefer their new owners to not use them for breeding purposes.

After we sell our pups we give return policy up to 5 days after selling because we want to make sure that they go to homes where the owner can love them and take great care of them. They have a certificate from their vet. We guarantee they are healthy pups. You are welcome to come view them at our family home, because I work in a hospital, I cant always answer the phone but I will definitely always ring back. Best dogs for children with autism.

Very healthy, chunky, clean puppies. All puppies have black, perfect face mask. Girls
