I'm selling my exup to make space in my garage as i have far too many bikes and am looking to move soon. It's the second exup i've owned, i bought her after regretting selling my last one. She's in good condition, has brand new ebc vee rotors and pads up front, a brand new Accossato radial setup with brand new braided WezMoto lines and gold spot R1 calipers. All one track day old. (apart from the calipers). Tyres are michelin pilot power and have life left in them, chain and sprockets are good. The previous owner informed me that the old girl had a gas flowed head, i cannot confirm this, although she runs well and has plenty of grunt, i was matching and even catching a cbr600 with 120whp at brands. Negatives, the nose cone is a skidmarxx unit and is white, i do have two or three standard units in the right colour that could be repaired.... The headstock bearings are a little notchy and could do with either removing and cleaning or replacing. MOT'd till 18 May. So grab yourself a piece of rapidly appreciating 90's iconic sportsbike while they're still cheap! 07460 467 387 07460 467 3...(click to reveal full phone)
