Are you planning to build or extend your garage? Do you need to apply for planning permission? Can you see trees near to your property? Did you know that you may need a tree report to support your planning application? Most local authorities, in recent years, have started to request an arboricultural development report to B.S.5837:2012 if there are tree within "influencing distance" of the proposed alterations to your property. Without the tree report accompanying planning applications, in many cases, the applications will not be processed consequently can result in delays in achieving approval. To preempt the situation, and to speed up the application process, it is advisable to submit the arboricultural development tree report with the application. Here at SMW (Tree) Consultancy Ltd it is our job to carry out arboricultural development reports, so we are very familiar with the processes involved. We can take care of all your requirements, carrying out a full development tree report including capturing the tree positions accurately via GPS and laser measurements, digitally plotting them on an O.S map, constructing detailed report outlining the necessary tree protection measures, foundation construction and any works required to the trees to clear your proposed garage alterations. All for a fixed fee! Please contact us using the details below to discuss your requirements and for your free, no obligation quote! Kind regards Steve Wood click to contact 01276 385 65 or 07415 115 010 07415 115 0...(click to reveal full phone)
