Steel Palisade Fence is widely accepted as the industry leader to protect and deter general attack from all types and conditions of intrusion. The pales are made of hot formed and cold rolled steel belts. These belts offer both strength and rigidity combined with along life span. Durable Metal Palisade Fence normally produce three types of pales, "W" profile, "D" profile and angle iron. Steel palisade fence panel is the most popular choice for locations requiring a higher level of security and vandal resistance in world. Steel palisade fencing is especially popular for schools and industrial sites because of its high damage resistance and the fact that it is so difficult to climb. Steel palisade fencing could be hot dipped galvanised surface finishing and coated in a Polyester Powder Coated finish to any Standard RAL color. Durable Metal Steel Palisade Fence supply a full range of heights starting from 1.2 meters up to 3.6 meters. We supply Panels assembly on site in bays of 2.75m. Generally steel palisade fence is connected by anti-theft bolts and clamp without welding. Installation is easy and quick. If you require a fully welded palisade fencing panel, this is possible with an additional cost. Palisade fencing is becoming more popular, and because of its strength and security, Designed specifically for security fencing applications. Palisade is used widely for government projects and business as the ideal visual barrier against intruders. Benefits of Durable Metal Steel Palisade Fence: Stronger than traditional steel palisade systems Greater protection against intruders and vandals A range of choices, an adaptable system to suit all situations Lightweight offers cost savings on labor and transport Low
