Red cherry shrimps for sale - 15 shrimps for 10 or 1 each (1 GBP)

Location London, London https://www.freeadsz.co.uk/x-502488-z

RED CHERRY SHRIMPS are a great addition for Tropical Freshwater Aquarium. They are easy to keep and really interesting and fun to watch. The optimum aquarium temperature for Shrimps is around (24-29°C). Red cherry shrimps are primarily algae eaters but they also will eat any food intended for aquarium use. I'm selling them 15 shrimps for £10 or £1 each. The 15 shrimps will include both adults and juveniles. Please make sure you have a suitable tank ready for them and research done just to make sure that they will be happy at new home. Selling as we have too many and they breed like crazy! Currently kept with a guppies, platies, mollies... who don't bother them. No good with large fish or frogs etc as even full grown they are only aprox 2cm. Collection only from Putney Heath -.
