Are you fed up of wearing long sleeves shirts in the summer, or covering up when everyone else is stripping off? Or perhaps your tattoo serves as an all too permanent reminder of an uncomfortable or unwanted memory? Until recently getting an unwanted tattoo removed has been a daunting task, but now there is a revolutionary method of ink extraction developed in the USA to remove that tattoo quickly, easily and permanently. Our system works much like having the original tattoo, but instead of ink uses a specially formulated cream that bonds with the original tattoo ink and draws it to the skin surface. The cream doesn't remain in the skin, or replace the tattoo and the treatment is so effective that a tattoo can usually be completely removed in 3 - 4 sessions on average, compared to the dozens of treatments required by laser removal methods. **FREE CONSULTATION**
